Certificate to Transport Livestock* Under Veterinary Advice

(under Australian Animal Welfare Standards & Guidelines for Land Transport of Livestock, Part A, Section 4, SA 4.2)
*(*to be used for buffalo, bison, camelids, deer, goats, horses, pigs, poultry and ratites. For sheep and cattle use specific certificate)*

This is to certify that I examined the following livestock intended for transport:

Date:		Time:	
Location and Owner/Consignor: (Name, Address, PIC)			
Species and identification of livestock:	Species: ID:		
Purpose of transport:	[ ] Slaughter [ ] Treatment [ ] Feed/Management [ ] Other:		
Proposed Destination: (Receiver name, address, PIC)			
Proposed time/dates for start and end of transport:	Start: End:		
These livestock were consistent with Standard SA4.2 of Australian Animal Welfare Standards and Guidelines Land Transport of Livestock 2012 and were not :	[ ] unable to walk on its own by bearing weight on all legs [ ] severely emaciated [ ] visibly dehydrated [ ] showing visible signs of severe injury or distress [ ] suffering from conditions that are likely to cause increased pain or distress during transport		

The animal is exhibiting the following clinical signs at the time of examination:

Veterinarians may only certify compromised animals as being fit for transport where it is in the best interest of the welfare of the animal. My advice is that the above stock are fit for transport as described above provided the following conditions are met:

(a) They are transported within [ ] hours / days (b) They are transported directly to the destination, and transport is not more than [ ] hours duration. (c) That there is no worsening of the condition prior to transport (d) The animal is handled with appropriate care (e) The transporter is aware of the animal's condition	(f) The animal is penned in truck at reduced density: [ ] 90% [ ] 50% [ ] with 1-2 others [ ] Other: (g) The receiver is aware of the animal's condition (h) Extreme environmental conditions are not predicted (i) Plans for emergency humane destruction are in place if necessary
(j) Other:
