

Together for wildlife.

Wildlife Welfare in Victoria Webinar Series

Wednesday 7 December 2022
6:30pm-7:30pm [[RSVP HERE](#)]

Summer Season Outlook: 2022-23

Rodney Vile, Principal Wildlife Emergencies Officer at the Department of Environment, Land, Water and Planning (DELWP) will give us a season update so we can improve our understanding of current flood response and learn what to expect over the coming months.

Wildlife Emergency Support Network (WESN)

Established after the 2019-20 bushfires, the WESN brings together the wildlife welfare community, including veterinarians, vet nurses and wildlife rescuers, in a collaborative approach to support DELWP's wildlife response during emergencies. We'll hear from the WESN Coordinator who will share details of the WESN's role, including the opportunities for wildlife carers and veterinary staff to participate in preparedness and response activities and information about the DELWP-accredited training for non-agency emergency response roles.

Q&A Session

Speakers will then participate in a Q&A session, facilitated by Fiona Ryan, Wildlife Outreach Program Coordinator at Zoos Victoria.
