70 Definitions

- (1) In this Part and Part VI, unless inconsistent with the context or subject-matter—

aggregated commercial quantity, in relation to 2 or more drugs of dependence, means a quantity determined as follows—

- (a) the quantity of each drug of dependence involved in the alleged offence is determined as a fraction of—
- (i) in the case of a drug of dependence which is a narcotic plant, the commercial quantity specified in column 2 of Part 2 of Schedule Eleven in respect of that drug of dependence; and
 - (ii) in relation to a drug of dependence the name of which is specified in column 1 of Part 3 of Schedule Eleven—

- (A) if that drug of dependence is contained in or mixed with another substance and the quantity of that mixture of drug of dependence and other substance is not less than the quantity specified in column 2A of that Part of that Schedule opposite to the name of that drug of dependence, means any amount of that drug of dependence; or
- (B) in any other case, means the quantity that is specified in column 2 of that Part of that Schedule opposite to the name of that drug of dependence; and
- (b) the fractions determined under paragraph (a) are added together; and
- (c) the quantity is an aggregated commercial quantity if the total of those fractions when added together is equal to or greater than the number "1";

Example 1

Drug of dependence not contained in or mixed with other substance

Jack is in possession of 200 grams of heroin, 80 grams of amphetamine and 800 grams of tetrahydrocannabinol. The individual commercial quantities for each of those drugs is 250 grams, 100 grams and 1 kilogram respectively (as set out in column 2 of Part 3 of Schedule Eleven), so each of these quantities is not individually a commercial quantity for trafficking.

To aggregate the individual quantities, determine the quantities involved as fractions of the specified commercial quantities: $\frac{200}{250}$ (heroin), $\frac{80}{100}$ (amphetamine) and $\frac{800}{1000}$ (tetrahydrocannabinol) ie $\frac{4}{5}$ plus $\frac{4}{5}$ plus $\frac{4}{5}$. The total of the fractions when added together is $\frac{12}{5}$ or 2.4 which is a number greater than 1. This is a quantity which is not less than an aggregated commercial quantity of 2 or more drugs of dependence.

Example 2

Drug of dependence not contained in or mixed with other substance Jill is in possession of 80 cannabis plants and 800 grams of tetrahydrocannabinol. The individual commercial quantities for each of those drugs is 100 plants and 1 kilogram respectively (as set out in column 2 of Part 2 of Schedule Eleven and column 2 of Part 3 of Schedule Eleven), so each of these quantities is not individually a commercial quantity for trafficking.

To aggregate the individual quantities, determine the quantities involved as fractions of the specified commercial quantities: $\frac{80}{100}$ (cannabis plants) and $\frac{800}{1000}$ (tetrahydrocannabinol) ie $\frac{8}{10}$ plus $\frac{8}{10}$. The total of the fractions when added together is $\frac{16}{10}$ or 1.6 which is a number greater than 1. This is a quantity which is not less than an aggregated commercial quantity of 2 or more drugs of dependence.

Example 3

Drug of dependence contained in or mixed with other substance

Fred is in possession of 400 grams of a substance containing 240 grams of heroin, 400 grams of a substance containing 200 grams of amphetamine and 8 kilograms of a substance containing 900 grams of tetrahydrocannabinol. The individual commercial quantities for a mixture of one of these drugs and another substance (as set out in column 2A of Part 3 of Schedule Eleven), comprise 500 grams for heroin, 500 grams for amphetamine, and

Drugs, Poisons and Controlled Substances Act 1981
No. 9719 of 1981
Part V—Drugs of dependence and related matters

10 kilograms for tetrahydracannabinol, so each of these quantities is not individually a commercial quantity for trafficking.

To aggregate the individual quantities, determine the quantities involved as fractions of the specified commercial quantities $\frac{400}{500}$ (quantity of mixture of substance and heroin), $\frac{400}{500}$ (quantity of mixture of substance and amphetamine), $\frac{800}{1000}$ (quantity of mixture of substance and tetrahydrocannabinol) i.e. $\frac{4}{5}$ plus $\frac{4}{5}$ plus $\frac{4}{5}$. The total of these fractions is $\frac{12}{5}$ or 2.4 which is a number greater than 1. This is a quantity which is not less than an aggregated commercial quantity of 2 or more drugs of dependence.

Note

For narcotic plants, quantities are to be calculated on the quantity specified for a drug of dependence in column 2 of Part 2 of Schedule Eleven.

Quantities of drugs of dependence contained in or mixed with another substance are to be calculated on the quantities specified in column 2A of Part 3 of Schedule Eleven.

In the case of a drug of dependence specified in column 1 of Part 3 of Schedule Eleven, quantities are to be calculated either on the quantity specified for the drug of dependence in column 2 of Part 3 of Schedule Eleven (if that drug is not contained in or mixed with another substance) or on the quantity specified for the drug of dependence in column 2A of Part 3 of Schedule Eleven (if that drug is contained in or mixed with another substance).

If a quantity is calculated on a quantity specified in column 2 of Part 3 of Schedule Eleven in respect of a drug of dependence, any other substance contained in or mixed with that drug of dependence is not to be included in the calculation.

aggregated large commercial quantity, in relation to 2 or more drugs of dependence, means a quantity determined as follows—

- (a) the quantity of each drug of dependence involved in the alleged offence is determined as a fraction of—
 - (i) in the case of a drug of dependence which is a narcotic plant, the large commercial quantity specified in column 1A of Part 2 of Schedule Eleven in respect of that drug of dependence; and
 - (ii) in relation to a drug of dependence the name of which is specified in column 1 of Part 3 of Schedule Eleven—
 - (A) if that drug of dependence is contained in or mixed with another substance and the quantity of that mixture of drug of dependence and other substance is not less than the quantity specified in column 1B of that Part of that Schedule opposite to the name of that drug of dependence, means any amount of that drug of dependence; or

- (B) in any other case, means the quantity that is specified in column 1A of that Part of that Schedule opposite to the name of that drug of dependence; and
- (b) the fractions determined under paragraph (a) are added together; and
- (c) the quantity is an aggregated large commercial quantity if the total of those fractions when added together is equal to or greater than the number "1";

Examples

Example 1

Drug of dependence contained in or mixed with other substance

Bill is in possession of 800 grams of a substance containing 250 grams of amphetamine, 600 grams of a substance containing 200 grams of heroin, 450 grams of a substance containing 100 grams of methylamphetamine. The individual large commercial quantities for a mixture of one of these drugs and another substance (as set out in column 1B of Part 3 of Schedule Eleven), comprise 1 kilogram for amphetamine, 1 kilogram for heroin and 750 grams for methylamphetamine so each of these quantities is not individually a large commercial quantity for trafficking.

To aggregate the individual quantities, determine the quantities involved as fractions of the specified large commercial quantities $\frac{800}{1000}$ (quantity of mixture of substance and amphetamine), $\frac{600}{1000}$ (quantity of mixture of substances and heroin), $\frac{450}{750}$ (quantity of mixture of substance and methylamphetamine), i.e. $\frac{4}{5}$ plus $\frac{3}{5}$ plus $\frac{3}{5}$. The total of these fractions is $\frac{10}{5}$ or 2 which is a number greater than 1. This is a quantity which is not less than an aggregated large commercial quantity of 2 or more drugs of dependence.

Example 2

Drug of dependence not contained in or mixed with other substance

Fredrica is in possession of 150 grams of heroin, 300 grams of amphetamine, and 450 grams of cocaine. The individual large commercial quantities for each of those drugs (as set out in Column 1A of Part 3 of Schedule Eleven), comprise 750 grams for heroin, 750 grams for amphetamine and 750 grams for cocaine so each of these quantities is not individually a large commercial quantity for trafficking.

To aggregate the individual quantities, determine the quantities involved as fractions of the specified large commercial quantities $\frac{150}{750}$ (heroin), $\frac{300}{750}$ (amphetamine), $\frac{450}{750}$ (cocaine), i.e. $\frac{1}{5}$ plus $\frac{2}{5}$ plus $\frac{3}{5}$. The total of these fractions is $\frac{6}{5}$ or 1.2 which is a number greater than 1. This is a quantity which is not less than an aggregated large commercial quantity of 2 or more drugs of dependence.

Note

For narcotic plants, quantities are to be calculated on the quantity specified for a drug of dependence in column 1A of Part 2 of Schedule Eleven.

Quantities of drugs of dependence contained in or mixed with another substance are to be calculated on the quantities specified in column 1B of Part 3 of Schedule Eleven.

In the case of a drug of dependence specified in column 1 of Part 3 of Schedule Eleven, quantities are to be calculated either on the quantity specified for the drug of dependence in column 1A of Part 3 of Schedule Eleven (if that drug is not contained in or mixed with another substance) or on the quantity specified for the drug of dependence in column 1B of Part 3 of Schedule Eleven (if that drug is contained in or mixed with another substance). If a quantity is calculated on a quantity specified in column 1A of Part 3 of Schedule Eleven in respect of a drug of dependence, any other substance contained in or mixed with that drug of dependence is not to be included in the calculation.

INTERPRETATION OF LEGISLATION ACT 1984 (ILA)

Style changes

Section 54A of the ILA authorises the making of the style changes set out in Schedule 1 to that Act.

References to ILA s. 39B

Sidenotes which cite ILA s. 39B refer to section 39B of the ILA which provides that where an undivided section or clause of a Schedule is amended by the insertion of one or more subsections or subclauses, the original section or clause becomes subsection or subclause (1) and is amended by the insertion of the expression "(1)" at the beginning of the original section or clause.

Interpretation

As from 1 January 2001, amendments to section 36 of the ILA have the following effects:

- **Headings**

All headings included in an Act which is passed on or after 1 January 2001 form part of that Act. Any heading inserted in an Act which was passed before 1 January 2001, by an Act passed on or after 1 January 2001, forms part of that Act. This includes headings to Parts, Divisions or Subdivisions in a Schedule; sections; clauses; items; tables; columns; examples; diagrams; notes or forms. See section 36(1A)(2A).

- **Examples, diagrams or notes**

All examples, diagrams or notes included in an Act which is passed on or after 1 January 2001 form part of that Act. Any examples, diagrams or notes inserted in an Act which was passed before 1 January 2001, by an Act passed on or after 1 January 2001, form part of that Act. See section 36(3A).

- **Punctuation**

All punctuation included in an Act which is passed on or after 1 January 2001 forms part of that Act. Any punctuation inserted in an Act which was passed before 1 January 2001, by an Act passed on or after 1 January 2001, forms part of that Act. See section 36(3B).

- **Provision numbers**

All provision numbers included in an Act form part of that Act, whether inserted in the Act before, on or after 1 January 2001. Provision numbers include section numbers, subsection numbers, paragraphs and subparagraphs. See section 36(3C).

- **Location of "legislative items"**

A "legislative item" is a penalty, an example or a note. As from 13 October 2004, a legislative item relating to a provision of an Act is taken to be at the foot of that provision even if it is preceded or followed by another legislative item that relates to that provision. For example, if a penalty at the foot of a provision is followed by a note, both of these legislative items will be regarded as being at the foot of that provision. See section 36B.

- **Other material**

Any explanatory memorandum, table of provisions, endnotes, index and other material printed after the Endnotes does not form part of an Act. See section 36(3)(3D)(3E).
